

## CRD

Crystal Relief Design is an optimized 3D relief effect. It looks like crystal clear and contains strong metallic and 3D effect.

## Space Moving

The letters "HG" and "OK" are moving from 4 directions. When moving the hologram from left to right, the letters move up down. When moving the hologram up down, the letters move left to right.

## Ultra-hidden

The apparent is not visible in front view by controlling nanosacle line, but can be visible through a special narrow angel, which could apply for security feature enhanced design combine with flip-flop effect.

## Shaped Lens

The lens can be designed as water droplet and other customized deign, which supply special visual effect and high-level security effect.

## Magic Lens

It looks like a mysterious area and foggy under normal light. When you open the point light to foggy ball, the magic change jumps into your eyes, Chinese texts "华工" hidden in the lens and can be visible clearly, moving in the different layers.

## Multi-channel Laser Covert

Rather than traditional laser hidden effect with limits in one element, Multi-Channel Laser Covert contains four different encrypted information at four directions (left-, right-, up-, down-).

## Dual-color Transformation

In front view, the red image lies in the green background. If turn the sample 90 degree angle, the image will turn green and the background will turn red.
